6. Brief Description of the Character of Business Conducted in Rhode Island

Creative Facility Design is an environmental energy consultancy that offers a wide range of services: They can evaluate the performance of load versus cooling for any given equipment distribution in an existing or new facility by creating the Virtual Facility (VF) representation of the data center. This is done using a unique application called 6SigmaDC software tools. These consultations can continue to form the basis of further optimization for the facility design. For a typical pressurized floor facility, these can include:- Floor void depth analysis against pressure distribution - Size and distribution of air handler units - Floor tile layout and the subsequent airflow through them - Equipment load distribution - Failure analysis. The company emphasizes service and support to differentiate itself from more price-oriented service companies.
